

Patient Positioners and Table Pads

800.409.2688

TI Services carries a full line of patient positioning aides and replacement pads for most camera tables. The protective coating on these positioners seal against the fluids encountered in a busy medical imaging departments. The pads and positioners can be easily cleaned and disinfected which saves your department money when compared to single use equivalents. They are fluid proof, latex-free, non-skid and antimicrobial. The positioners have very low attenuation which makes them an excellent choice for CT and MRI. Table pads are available for nearly every imaging table. Custom orders are accepted which means if you have a particular need for a pad or positioner we can accommodate it in most cases.

Just give us a call and any TI Salesperson will be happy to assist you!
